Address: Dhoke Sydian, Ghazi Abad, HD School Street, H # CB-2895/1, Rawalpindi

SUMMARY

Computer Science graduate (CGPA 3.81/4.00) from Fatima Jinnah Women University with hands-on experience across Flutter mobile development, machine learning, deep learning, and data analysis. Built and deployed 10+ end-to-end projects including a bilingual assistive learning app, deployed CNN classifiers, and an AI-powered agricultural decision-support platform selected for the Alibaba Cloud AI Hackathon Pakistan 2026. Published a Python package to PyPI and completed a Google Data Analytics Professional Certificate plus a 3-month AI/ML/DL training program at Corvit. Combines strong software engineering fundamentals with applied AI/ML skills and a track record of shipping complete, working products.

EDUCATION

BS Computer Science — Fatima Jinnah Women University (FJWU), Rawalpindi **2022 – 2026** | **CGPA**: 3.81 / 4.00 **(95.25%)**

Intermediate (ICS) — FG College for Women, Rawalpindi **2020 – 2022** | **Marks:** 966/1100 **(87.6%)**

Matriculation (Science) – TMD Public School **2018 – 2020** | **Marks:** 1021/1100 **(92.81%)**

CORE SKILLS

- **Mobile Development**: Flutter, Dart, Flutter Flame, Provider & Riverpod state management, Firebase, REST API integration
- **Backend & Data**: Node.js, Express.js, Django REST Framework, PostgreSQL, SQL, RDBMS design
- **Machine Learning, Deep Learning**: EDA, data visualization, Linear & Logistic Regression, KMeans Clustering, CNN, RNN, Transformer, Model Evaluation & Deployment.
- **Tools**: Git/GitHub, Postman, PyCharm, Jupyter Notebook, Antigravity

EXPERIENCE

App Development Intern — NerdFlow, NASTP | *3 months*

- Converted Figma designs into functional Flutter screens and built a CRM application UI focused on usability and clean layout architecture.
- Integrated state management using Provider and Riverpod to improve app scalability and maintainability.
- Developed role-based access control (RBAC) and user management modules.

Flutter Development Intern — The Nixus, NASTP | *6 weeks*

- Developed and optimized Flutter-based mobile applications, improving UI responsiveness and user experience.
- Built and integrated backend services using Node.js and PostgreSQL for efficient data storage and management.
- Implemented authentication flows (login/signup), CRUD operations, and API integration.

Data Science Intern — ITSolera | *6 weeks*

- Collected, cleaned, and processed real-world datasets using Python and Excel; performed exploratory data analysis to uncover trends and generate actionable insights.
- Developed interactive dashboards to visualize KPIs and business metrics, and presented findings through data-driven reports.

AI/ML/DL Trainee — Corvit (sponsored by NAVTTC) | *3 months*

- Completed a structured, hands-on training program covering data visualization, statistics, NumPy/Pandas, OOP, and core ML fundamentals.
- Delivered graded assignments on linear and logistic regression, clustering, and applied ML workflows.

FLAGSHIP PROJECTS

HopeLearn — Bilingual Assistive Learning App (Final Year Project)
Flutter, Django, Firebase, Google Speech API, Flutter Flame

- Built a bilingual (Urdu/English) mobile app for children with intellectual and developmental delays, with custom RTL support for Urdu and accessibility-focused, child-friendly design.
- Implemented speech-based learning features via Google Speech APIs and interactive educational games using the Flutter Flame engine; managed real-time sync and progress tracking with Firebase and Django.

HarvestGuard — AI Powered Agricultural Decision-Support Platform
React, TypeScript, Vite, RAG | Alibaba Cloud AI Hackathon Pakistan 2026 (Selected Project)

- Co-developing an AI-powered platform helping farmers reduce spoilage and make market decisions, selected for the Alibaba Cloud AI Hackathon Pakistan 2026.
- Structured five datasets (crop profiles, weather, market prices, post-harvest losses, RAG knowledge base) and built a data-driven React/TypeScript/Vite frontend.

CERTIFICATIONS & TRAINING

- Google Data Analytics Professional Certificate — Coursera
- Machine Learning & Deep Learning Training — Corvit (sponsored by NAVTTC), 3 months
- Improve Productivity and Performance with Canva
